## QUALITY POLICY

Management of TRADING FILMS, S.L., an organization engaged in the commercialization, distribution, and handling of thermoplastic polymers, aluminum foil, and biopolymers for the flexible packaging, industrial, and graphic arts sectors, expresses the following statement regarding its Quality Policy and Objectives.

- The main objective of the Quality Management Systems is to ensure the quality of our products in a way that meets the needs of our customers and complies with applicable specifications, including legal and regulatory requirements, while aligning with the company's strategic direction.
- The implementation of this system based on the international standard ISO 9001 brings greater efficiency to the operations of Trading Films S.L., as well as a reduction in internal non-conformities and customer complaints, thereby increasing customer satisfaction.
- In order to achieve continuous improvement, Management of Trading Films S.L. establishes a set of quantitative objectives that are periodically reviewed, within the company's strategy based on risk analysis and opportunity management.
- Attaining quality levels requires the knowledge, commitment, and participation of all personnel at Trading Films S.L., and it is achieved through the proper application of the Quality Manual, Processes, and Procedures, developed within the documented framework of the system.
- A continuous concern of Management of Trading Films S.L. is the training, qualification, and awareness of personnel, the verification of compliance with established provisions, and the updating of the Manual and Processes to align them with the achievement of the planned objectives.
- Management of Trading Films S.L. delegates to the Quality Manager the authority for the quality of our products, with the aim of ensuring that the implemented system complies with the requirements established in the indicated reference standard, and to report on its operation in order to take appropriate measures for the continuous improvement of the System.
